2018 Community Benefit Report  
On 2017 - 2019 Implementation Strategies  
Executive Summary

This community benefit report describes the programs and services that take place every day at Charleston Area Medical Center to improve the health of our community.

In 2018, Charleston Area Medical Center provided $136,170,492 in community benefit. Our programs and services go well beyond the traditional health care we often think of when we consider hospital care and are delivered both inside and outside the walls of our hospitals. They are driven by our mission, *Striving to provide the best health care to every patient, every day.* Our hospitals and outpatient programs and services bring our mission to life – providing effective, efficient, equitable, timely and safe care to all, regardless of ability to pay.

Charleston Area Medical Center is a not-for-profit four-hospital system comprised of CAMC Memorial Hospital, CAMC General Hospital and CAMC Women and Children’s Hospital. CAMC Teays Valley Hospital was added in March 2014 and has its own community health needs assessment, implementation strategies and community benefit report. Our hospitals operate under one administrative structure and participate in joint strategic planning and budgeting processes. Each hospital has responsibility for key service lines. Our hospitals are designed to provide care for our community residents throughout every stage of their lives. Our patients depend on us to provide convenient and compassionate care – care delivered regardless of a patient’s ability to pay. We provide our community with programs of excellence in cardiovascular services, medicine, surgery, oncology, trauma, neurology, orthopedics, rehabilitation, bariatrics, and women and children’s services.

We give back to our community because we understand the impact that exceptional medical care, charity care, education, corporate contributions and community partnerships have on the lives of real people. In this report, you will read about examples of the programs we provide to the community and how we demonstrate our community commitment.

CAMC General Hospital  
CAMC Memorial Hospital  
CAMC Women and Children’s Hospital
2018 COMMUNITY BENEFIT SUMMARY for CAMC MEMORIAL, CAMC GENERAL, CAMC WOMEN and CHILDREN’S, and CAMC TEAYS VALLEY HOSPITALS*

CHARITY CARE AT COST
Free or discounted health services provided to persons who meet the organization’s criteria for financial assistance and are thereby deemed unable to pay for all or a portion of the services. Charity care is reported in terms of costs, not charges. Charity care does not include: (1) bad debt or uncollectible charges that the hospital recorded as revenue but wrote off due to failure to pay by patients, or the cost of providing such care to patients, (2) the difference between the cost of care provided under Medicaid or other means-tested government programs or under Medicare and the revenue derived therefrom, or (3) contractual adjustments with any third-party payors.

$18,289,254

GOVERNMENT SPONSORED MEANS-TESTED HEALTH CARE SHORTFALLS
Includes the unpaid costs of public programs for low income persons; the “shortfall” created when a facility receives payments that are less than cost of caring for public program beneficiaries. This payment shortfall is not the same as a contractual allowance, which is the full difference between charges and government payments.

Unreimbursed Medicaid $77,605,393
Other Public Unreimbursed Costs $980,765
Includes CHIPS, Prevention First, Catastrophic Illness Commission, Community Access Program

SUBSIDIZED HEALTH SERVICES
Clinical programs that are provided despite a financial loss so significant that negative margins remain after removing the effects of charity care, bad debt and Medicaid shortfalls. Nevertheless, the service is provided because it meets an identified community need and if no longer offered, it would be either unavailable in the area or fall to the responsibility of the government or other not-for-profit organization to provide. Subsidized health services at CAMC include Family Resource Center support at $575,795, the Lactation Support Program at $213,254 and the Palliative Care Program at $838,728.

$1,321,689

COMMUNITY BENEFIT PROGRAMS AND SERVICES
See details beginning on page 38.

Community Health Improvement Services 1,450,425
Health Professions Education 35,730,418
Financial and In-Kind Contributions 319,833
Community Building Activities 360,378
Community Benefit Operations 112,337

TOTAL $37,973,391

In addition to the above, although Medicare and Bad Debt are not included as part of the community benefit report per IRS guidelines, they are reflective of CAMC’s role in providing benefit to our community.

UNREIMBURSED MEDICARE AT COST
Medicare is not considered a means tested program and thus is not included as part of community benefit.

$172,210,872

BAD DEBT AT CHARGE
Unreimbursed charges, excluding contractual adjustments, arising from the failure to pay by patients whose health care has not been classified as charity care.

$44,326,663

NOTE: Charity Care, Unreimbursed Medicare, Medicaid and Bad Debt – The total cost estimate for this care was determined by applying our Medicare ratio of cost to charges generated for these patient financial classifications.

* CAMC Teays Valley Hospital became part of Charleston Area Medical Center, Inc. in March 2014 and all CAMC hospitals are under the same provider number.
The Kanawha Coalition for Community Health Improvement was founded in 1994 by Charleston Area Medical Center and other Kanawha County hospitals working in partnership with local organizations. The Coalition’s mission is to identify and evaluate health risks and coordinate resources to measurably improve the health of the people of Kanawha County. A Community Needs Assessment is conducted through the Kanawha Coalition for Community Health Improvement every three years. The Implementation Strategies in this report are based on the 2017 Community Health Needs Assessment. The community forum prioritizes the top health issues and the Kanawha Coalition forms work groups to address the top three issues. CAMC supports the work of these groups but also addresses the remaining health issues through a systematic process described on page 26.

The Kanawha Coalition for Community Health Improvement’s goals for the Community Health Needs Assessment process include:

1. Assess the health needs of the citizens of Kanawha County.
2. Inventory available resources.
3. Determine unmet needs.
4. Evaluate and prioritize needs.
5. Involve affected organizations and constituencies in developing possible solutions.
6. Develop consensus.
7. Facilitate implementation.
8. Measure and evaluate outcomes.

The top three issues prioritized by the community from the 2017 Community Needs Assessment are listed below. Each of these issues is being addressed by a Kanawha Coalition for Community Health Improvement work group. Progress reports for each of these workgroups follows.

<table>
<thead>
<tr>
<th>Drugs (All types, does not include alcohol)</th>
<th>Diabetes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Obesity (Includes physical inactivity and lack of access to physical activity opportunities)</td>
<td></td>
</tr>
</tbody>
</table>

CAMC staff serves on the community workgroups of the Kanawha Coalition for Community Health Improvement and along with Steering Committee members are involved in development of a community-wide community benefit plan addressing the top three health issues identified during the Community Forum. They also support plan implementation and outcome measurement. The Steering Committee provides ongoing oversight to the work groups’ plans. The workgroups accomplishments were as follows in 2018.
Kanawha-County Health Improvement Process
Implementation Plan

Date Created: 8/1/2017
Date Reviewed/Updated: 12/31/2018

**PRIORITY AREA:** Substance Abuse (Illicit, not including Tobacco/Alcohol)

**GOAL:** To develop an integrated system of care for coordination of health that addresses coordination, prevention and risk reduction, access to care, and cost of services related to Substance Use Disorders (SUDs).

### PERFORMANCE MEASURES

**OBJECTIVE #1:** Partner with Kanawha County Schools and Kanawha Communities that Care to implement substance abuse prevention education in grades Kindergarten through 12.

**BACKGROUND ON STRATEGY**
Source: [http://legacy.nreppadmin.net/ViewIntervention.aspx?id=75](http://legacy.nreppadmin.net/ViewIntervention.aspx?id=75)

**Evidence Base:** Developing social emotional learning skills, bonding with the school/teacher, and adopting conventional norms about substance use and aggression are all protective factors that decrease the likelihood of violent behavior and substance use, while increasing the likelihood of student success both socially and academically.

**Type of Change(s):** □ Policy □ Systems □ Environmental

**Rationale:** Legislative House Bill 2195 passed April 2017, requires comprehensive drug awareness and prevention program in all public schools; and requires county boards to implement no later than 2018-2019 school year

**Strategy:** Prevention education

**Target Audience:** Kanawha County Youth, grade levels Kindergarten through High School

**OBJECTIVE #3: Establish Quick Response Teams to connect people to treatment and prevent future overdoses.**

**BACKGROUND ON STRATEGY**

Source: Based on the success of the Colerain Township, Ohio Quick Response Team model. [http://www.watchusthrive.org/colerain.aspx](http://www.watchusthrive.org/colerain.aspx)

Evidence Base: Since the Colerain Township QRT’s deployment, 100% of the overdose victims who received face-to-face follow-up from the QRT team within five days of the overdose are now in treatment. Colerain Township has reported a 33% reduction in overdoses.

Type of Change(s): ☐ Policy ☒ Systems ☒ Environmental

Rationale: The week following an overdose presents a time when there is a higher probability that an addict will be willing to seek treatment.

Strategy: Establish Quick Response Teams (QRTs) to respond within 48 hours of overdoses and provide assistance to addicts and families and try to link them to services.

Target Audience: People who have overdosed and their families

**OBJECTIVE #4:** Establish an early intervention and referral to substance use disorder treatment program to help hospital patients who may be struggling with alcohol or drug use.

**BACKGROUND ON STRATEGY**

*Type of Change(s):* ☐ Policy ☑ Systems ☐ Environmental

*Rationale:* Evidence exists that Project Engage increases the number of patients entering into treatment, reduces in-patient falls, improves attitudes among nursing staff, and results in long-term costs savings.

*Strategy:* Establish Project Engage in Kanawha County

**Target Audience:** Patients with substance use disorders

### DESCRIBE PLANS FOR SUSTAINING ACTION

Since schools will already have been provided Too Good For Drug curriculum, the only need will be the procurement of student handbooks for future classes. This will be supported by parent groups through fundraisers.

Kanawha Communities That Care will assist in the procurement of the necessary financial support to sustain the youth leadership groups for middle schools and high schools.

SBIRT / Mental Health First Aid will be codified by Kanawha County Schools.

Quick Response Teams and Project ENGAGE will be sustained by local stakeholder groups.
PRIORITY AREA: Diabetes

GOAL: Establish a comprehensive and sustainable approach for educating Kanawha County residents who have been diagnosed as pre-diabetic or diabetic about healthy food options and where they can be accessed in their community.

OBJECTIVE #1: Convene and establish a Kanawha County Diabetes Coalition by March 28, 2018.

BACKGROUND ON STRATEGY
Source: https://livewell.marshall.edu/DMC/
Evidence Base: Diabetes coalitions help organize existing diabetes stakeholders around planning, implementing, and evaluating community based projects to help individuals with type two diabetes control their disease and prevent the disease in people who may be at risk.

Type of Change(s): Policy ☑ Systems ☑ Environmental
Rationale: It is proven successful in other West Virginia communities.
Strategy: To establish a county based coalition.
Target Audience: Adults with diabetes and pre-diabetes.

**OBJECTIVE #2:** Implement either nutrient dense food signage campaign or grocery store tours with 6 markets where food is sold in Kanawha County by December 31, 2018.
### BACKGROUND ON STRATEGY

**Source:** [https://cookingmatters.org/at-the-store](https://cookingmatters.org/at-the-store)

[https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4416784/pdf/nihms498630.pdf](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4416784/pdf/nihms498630.pdf)

**Evidence Base:** Nutrition education supports healthier food choices, which helps prevent onset of pre-diabetes and manage type-two diabetes.

**Type of Change(s):**
- Policy
- Systems
- Environmental

**Rationale:** Similar programs such as Cooking Matters have been featured by First Lady Michelle Obama’s Let’s Move! campaign and recognized by the U.S. Department of Agriculture for excellence in nutrition education. The Walmart Foundation is the national sponsor of Cooking Matters.

**Strategy:** Diabetic-Friendly Food Signage Campaign and Grocery Store Tours

**Target Audience:** Adults and Families

**OBJECTIVE #4: Establish fruits and vegetables Rx project by December 2019.**

**BACKGROUND ON STRATEGY**

Source: [https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4416784/](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4416784/)

Evidence Base: Evidence suggests that a fruit and vegetable Rx (prescription) approach promotes culture change among participating community partners and health centers, and may meet some needs of patients related to accessing, affording, and understanding the importance of healthy food.

Type of Change(s): ☐ Policy ☑ Systems ☐ Environmental

Rationale: Focus group findings revealed the need to better communications between health care providers and pre-diabetic/diabetic patients concerning healthy eating.
**Strategy:** Work with health care providers and pharmacists to institute an Rx project for fruits and vegetables for patients with pre-diabetes or diabetes. Increase fruit and vegetable consumption among these patients.

**Target Audience:** Adults with pre-diabetes or diabetes

OBJECTIVE #5: Work with one health care provider to link patients at risk for diabetes with a National Diabetes Prevention Program (NDDP) in Kanawha County by December 2018.

BACKGROUND ON STRATEGY
Evidence Base: The Community Preventive Services Task Force, an independent, nonfederal panel of public health and prevention experts, recommends programs like CDC-recognized lifestyle change programs—for people at increased risk of type-2 diabetes based on strong evidence of effectiveness in reducing new-onset diabetes.

Type of Change(s): Policy ☐ Systems ☑ Environmental ☐

Rationale: People with prediabetes who take part in a structured lifestyle change program can cut their risk of developing type 2 diabetes by 58% (71% for people over 60 years old). This finding was the result of the program helping people lose 5% to 7% of their body weight through healthier eating and 150 minutes of physical activity a week. For a person who weighs 200 pounds, losing 5% to 7% of their body weight means losing just 10 to 14 pounds. It doesn’t take a drastic weight loss to make a big impact. And the impact of this program can last for years to come. Research has found that even after 10 years, people who completed a diabetes prevention lifestyle change program were one third less likely to develop type-2 diabetes.

Strategy: Recruit health care provider(s) to screen patients at risk for diabetes and to refer patients to a National Diabetes Prevention Program. Recruit payers to partner in this project to assess return on investment (use of diabetes prevention cost calculator tools).

Target Audience: Adults with pre-diabetes

### DESCRIBE PLANS FOR SUSTAINING ACTION

- The Diabetes Coalition will develop its own sustainability plan.
- The food market strategies will include permanent diabetic-friendly food signage placement.
- A permanent home for the centralized database will be identified.
- Downloadable materials will be produces for use by pharmacies and clinicians for the Fruit and Vegetable Rx Project.
- Payers continue to provide reimbursements for the National Diabetes Prevention Program.
- Retrofit – online DPP
## PRIORITY AREA: Obesity

**GOAL:** Address overweight and obesity among Kanawha County residents by increasing their access to recreational/physical activity opportunities regardless of where they live.

**DESCRIBE PLANS FOR SUSTAINING ACTION**

A permanent home for the centralized database will be identified. Potentially 1305 Workshop Wizard database Local community development plans will be in place to address gaps in access to recreation/physical activity opportunities. Community members will be linked to local resources and key stakeholders who can help support community plans. Potential for Try This grants The need for sustaining the Turn Off campaign will be based on outcomes of initial campaign.
CHARLESTON AREA MEDICAL CENTER COMMUNITY NEEDS PLANNING

Charleston Area Medical Center is licensed for 956 beds on four campuses: General Hospital (268 beds), Memorial Hospital (472 beds), Women and Children’s Hospital (146 beds) and CAMC Teays Valley Hospital (70 beds). CAMC General, Memorial and Women and Children’s hospitals are all located in the city limits of Charleston in Kanawha County. General Hospital focuses primarily on the neurological, orthopedic, trauma and rehabilitation service lines. Memorial Hospital supports the cardiac, peripheral vascular and oncology services lines and Women and Children’s Hospital focuses on mother, baby, pediatric and gynecology service lines. Medicine and general surgery cross both Memorial and General Hospitals. Community benefit services are aligned by service versus hospital, thus at times are clearly aligned by hospital, but not in the case of many of the activities that span all hospitals. Additionally, many of our reports that are used for benchmarking and comparisons are for CAMC versus the individual hospitals.

Although all CAMC hospitals are licensed separately, the Kanawha County Charleston hospitals jointly plan, implement goals and report into one governance structure. Because CAMC Teays Valley Hospital is located in Putnam County and serves as a community hospital, it completes its own community needs assessment and implementation strategies.

The CAMC Board of Trustees governs all CAMC hospitals and approves the Community Health Needs Assessments, Implementation Strategies and annual community benefit reports.

Community benefit is defined as a program or activity that responds to a demonstrated health-related community need and seeks to achieve at least one community benefit objective:

- Improve access to health services
- Enhance public health
- Advance generalizable knowledge
- Relieve a government burden to improve health (CHA, Vizient, Verite Healthcare Consulting, February 2017)

The following outlines CAMC’s community support process:

Annually during the strategic planning process we review the community health needs assessment findings, community priorities and our Environmental Analysis. In alignment with our mission, vision and values, we identify community health projects and their associated communities for our community plan. These projects are planned, implemented, and posted to our CAMC website. We track and measure progress and use the DMAIC process for improvement. The CAMC Board approves the plan and reviews plan progress annually. Because of the size and scope of our services, the approach we use to identify our key communities is based on the project, key stakeholder needs, and our capacity. Our community for the KCCHI work groups is Kanawha County as determined by the KCCHI mission. For our CAMC strategy, community is based on the need identified through needs assessments for each of our service area counties and the population to be addressed. For example, our work to build a sustainable Research Infrastructure covers all of West Virginia and our HIV program serves our entire service area. Each strategy is deployed through a planning process that addresses key stakeholder needs and is
evaluated based on predetermined criteria for outcomes expected. Cycles of learning have resulted in alignment of Civic Affairs Council monetary contributions to community needs, and to improvements in the random telephone survey process. In addition, CAMC staff serve on the community workgroups of the Kanawha Coalition for Community Health Improvement and they, along with Steering Committee members are involved in development of a community-wide community benefit plan addressing the top three health issues identified during the Community Forum. They also support plan implementation and outcome measurement. The Steering Committee provides ongoing oversight to the work groups’ plans. Once the KCCHI plans are developed, as part of the strategic planning process, CAMC determines if there are additional areas of support that can be provided by CAMC to address the identified issues. The following table lists programs provided by CAMC that address these community priorities, and are identified and funded as part of operational planning by the CAMC Board of Trustees.

The following community priority need is not addressed by CAMC hospitals in a systematic way and the rationale is provided for each.
### 2017 - 2019 CAMC Community Benefit Plan
#### 2018 Progress on Implementation Strategies

**JOINT IMPLEMENTATION STRATEGIES:** The following community benefit implementation strategies are inclusive of CAMC General, CAMC Memorial and CAMC Women and Children’s hospitals. Due to our corporate structure, corporate support for planning, quality, safety, finance and other functions, we address these issues for all hospitals from a system perspective as Charleston Area Medical Center.

1. **Accountable Health Communities Program**
2. **Build the Base of Local Growers Providing Fresh Vegetables to CAMC**
3. **Provide HIV Primary Care and Decrease New HIV Infections**
4. **Examine How Brain Imaging Helps Guide Doctors in Treatment of Dementia and to Determine Whether These Changes in Treatment Lead to Better Medical Outcomes**
5. **Build a Sustainable Research Infrastructure that Substantively Contributes to Improving WV Health Outcomes**

<td>PROGRAM DESCRIPTION AND RATIONALE</td>
</tr>
<tr>
<td></td>
<td>Accountable Health Communities Program - The AHC program will systematically identify the health-related social needs of community-dwelling Medicare and Medicaid beneficiaries, including those who are dually eligible, and address their identified needs. Socioeconomic factors affect health across the life span either by providing, or limiting, access to adequate housing, nutrition, transportation, education, a safe physical environment, and a voice in policy. A large body of scientific evidence supports a fundamental relationship between income inequality and negative health outcomes and that reducing poverty would improve population health. Furthermore, increasing access to affordable services related to nutrition, education, housing and safety (both physical and psychological) could also improve population health by partially mitigating the impact of poverty on overall health and well-being. The U.S. Census Bureau estimates that 18.3% of West Virginia (WV) residents are currently living in poverty. Child poverty continues to increase with almost 12% living in deep poverty, meaning these children survive on family incomes that are 50% below the poverty line. WV currently ranks 47th out of 50 states in overall health when considering community and environmental factors (secure housing, food security, availability of violence-free places), access to quality, affordable clinical care, public health programs and influence on policy, and individual health behaviors such as physical inactivity, poor diet, and substance use. WV also ranks 49th out of 50 states in negative health behaviors including excessive drinking, smoking, obesity, physical inactivity, as well as low high school graduation rate and is ranked 48th and 50th in poor mental health and poor physical health days, respectively and 49th in both premature death and preventable hospitalizations. Poor overall health is a major public health and financial concern in WV. According to the National Health Expenditure...</td>
</tr>
</tbody>
</table>
Data: Health Expenditures by State of Residence Report, it costs approximately $13,964 in total health spending including all privately and publicly funded personal health care services to treat a patient. As of November 2015, WV had net expenditures, including CMS-64 adjustments, of more than $1.5 billion in health care with a projected cost of more than $2.5 billion by June 30, 2016. As of March 2016, 988,031 out of 1,844,128 West Virginians were enrolled in Medicare, Medicaid, and the Children’s Health Insurance related programs. Approximately 54% of WV residents are community-dwelling beneficiaries and represent a significant proportion of state health care expenditures. Despite these alarming health care issues and costs, WV residents have shown both a desire and a readiness for a healthy change in at least two ways: health care providers are incorporating patient navigation services for traditionally non-clinical needs that affect health and a statewide grassroots movement “Try This West Virginia” is helping inspire citizens within communities to collaborate on promotion of healthy behaviors. In response to the need for an accountable healthy community model, we have established a partnership consortium composed of 48 clinical sites within nine health systems that collectively serve all 55 counties of WV. We believe this consortium offers the most competitive approach for addressing the social service needs in the state because of the sustained expertise, innovative clinical practices and designs, and established coordination of social services of partners involved. The proposed consortium had 296,208 encounters (128,734 unique beneficiary encounters) with community-dwelling beneficiaries in the past twelve months and is confident in meeting the requirement to present opportunities to screen at least 75,000 beneficiaries per year for Year 2 through Year 4 as well as 18,750 during Year 1 and 37,500 during Year 5.

<table>
<thead>
<tr>
<th>STRATEGIC OBJECTIVE</th>
<th>IMPLEMENT THE ACCOUNTABLE HEALTH COMMUNITIES GRANT TO IMPROVE OVERALL PATIENT WELL-BEING, INCREASE HEALTH EQUITY, AND REDUCE THE COST OF HEALTH CARE FOR THOSE PARTICIPATING</th>
</tr>
</thead>
</table>
| GOALS TO ADDRESS THE HEALTH NEED | 1. Increase community-dwelling beneficiaries’ awareness of community resources that might be available to address their unmet health-related social needs.  
2. Increase the connection of high-risk community-dwelling beneficiaries with certain unmet health-related social needs to community resources through navigation services.  
3. Optimize community capacity to address health-related social needs through quality improvement, data-driven decision making, and coordination and alignment of community-based resources.  
4. Reduce inpatient and outpatient health care utilization and the total costs of health care by addressing unmet health-related social needs through referral and connection to community services. |
| MEASURE TO EVALUATE THE IMPACT | • Increase preventive health screenings  
• Decrease ED Visits  
• Decrease readmissions  
• Decrease healthcare costs  
• Increase appropriate utilization of outpatient services |
| TIMELINE | Five year project beginning 4/1/2017 through 3/31/2022 |

48 clinical sites within nine health systems that collectively serve all 55 counties of WV

2018 Progress Report

The Accountable Health Communities (AHC) project period began on May 1, 2017. During 2018, the following was accomplished:

- Standard Operating Procedures, implementation plans and training materials were updated and submitted to CMS.
- The Community Resource Inventory was updated with over 900 community resources included.
- The navigators visited clinical delivery sites and community resource organizations in preparation to begin navigating beneficiaries.
- Development work was completed on CAPGate and it passed the CMS data validation process.
- Patients were screened starting at the first 15 clinical delivery sites.
- Additional clinical delivery site staff were trained to begin screening beneficiaries in 2019.
- Fifty-one additional clinical delivery sites were approved by CMS.
- The Program Director, Screening and Referral Specialist and Database Administrator attended the AHC in-person meeting in Baltimore Maryland.

<tr>
<td>COMMUNITY HEALTH NEED</td>
<td>The wealth creation approach intends to improve the livelihoods of people by creating wealth that is owned, controlled, and reinvested in places, so that they become valued partners. By creating local wealth based on identified needs, we can increase local growers to provide healthy food to our community and to address Limited Access to Food</td>
</tr>
<tr>
<td>IDENTIFIED HEALTH ISSUE</td>
<td>Limited Access to Food, Diabetes, Obesity</td>
</tr>
<tr>
<td>COMMUNITY SERVED</td>
<td>Growers in our Primary and Secondary Service Area</td>
</tr>
</tbody>
</table>
CAMC is working with The Greater Kanawha Valley Foundation to create and sustain a wealth creation value chain. This approach bridges conventional approaches to community and economic development by using a systems framework, working with wealth creation value chains. CAMC’s 5 county primary service area is comprised of 356,000 people with small increases in the size of the working population since 1990. 18% of people and 25% of children live in poverty with little improvement over of the past 10 years. The health connection is that improvements in health care are associated with higher productivity in the workforce and for the economy overall. The value chain premises are that we need to be intentionally inclusive of local people and places as economic contributors to have a positive impact on wealth in our communities. This program’s focus is on working with local growers to develop their capability to sell their produce to CAMC at a guaranteed quantity and price and once the process is established to roll it out to other “buyers.”

**PROGRAM DESCRIPTION AND RATIONALE**

**STRATEGIC OBJECTIVE**

BUILD THE BASE OF LOCAL GROWERS SELLING FRESH VEGETABLES TO CAMC

**GOALS TO ADDRESS THE HEALTH NEED**

1. Support and encourage local growers to become GAP certified.
2. Provide guaranteed quantity and price to decrease risk to growers.

**MEASURE TO EVALUATE THE IMPACT**

- Number of growers GAP certified
- Number of growers providing fresh food to CAMC
- Amount of produce purchased by CAMC
- Amount of dollars going into our local grower community vs. out-of-state purchases.

**TIMELINE**

2017 - 2019

**RESOURCES**

Greater Kanawha Valley Foundation for program support
CAMC budget for food purchases

**PARTNERS/COLLABORATORS**

Greater Kanawha Valley Foundation
Morrison’s Food Services
Corey Brothers
WV Department of Agriculture
Local Growers

**2018 Progress Report**

WV now has 22 GAP certified growers. Local efforts include working with the state Department of Agriculture to increase the number of training classes and timeliness of the certification process. Met with growers and interest has increased. Supported growers with developing their Farm Safety Plans. Using a consultant to assist growers with training and mock audits. For the 2018 growing season (6/15/18 – 10/31/18), West Virginia, Ohio and Kentucky sourced product was $71,432 which is 19.16% of net purchases.

**PROGRAM DESCRIPTION AND RATIONALE**

The CAMC/WVU Charleston Division Ryan White (RW) Program’s mission is to increase access to services for individuals at-risk for, or infected with HIV disease and to provide culturally sensitive, quality, comprehensive HIV-related primary care, regardless of a patient’s ability to pay. The program is currently the only fully funded Part C site in southern West Virginia and provides HIV primary care to approximately 366 individuals. 38 new patients were served in 2018. Services include primary, pregnancy/pediatric care and HIV specialty care; mental health; case management and social services; pharmacist counseling; linkage and retention and dental care. The program serves primarily the rural, underserved and impoverished counties of this area. As of December 31, 2016, a total of 1,746 were living with HIV/AIDS with 739 (42%) reported from the program’s service area.

<td>The WV Clinical and Translational Science Institute (WVCTSI) was created in 2012 through the initial Clinical and Translational Research award and has subsequently formed a well-connected, statewide health research network, creating the infrastructure to address the substantial health issues of WV. Since 2012, WVCTSI has been a transformative force, implementing investigator mentoring services, establishing pilot project funding, forming a practice-based research network, creating an integrated data repository of 2 million unique electronic medical records, developing a culture of research integrity, and working with our partners to establish trust</td>
</tr>
</tbody>
</table>
and collaboration. Productivity has exponentially increased; publications tripled in Year 4 compared to Year 2, external funding applications more than doubled from Year 3 to 4, and external funding increased 80% over the past year. Funding is now directed to addiction and resultant emerging epidemics (hepatitis C), cancer, cardiovascular disease, and chronic lung disease.

Major Health Concerns: Poverty is pervasive in Appalachia with counties of “high poverty” (presence of poverty rates > 1.5 the U.S. average) located mainly in WV and Eastern Kentucky. Appalachian mortality rates have increased with most counties of eastern Kentucky and southern WV having mortality rates well in excess of the US average. WV ranks 47th among the 50 states in the 2015 America’s Health Rankings and at or near the bottom for a number of chronic diseases including cancer and cardiovascular disease. Moreover, WV has the highest prevalence of smoking. Drug addiction is highly prevalent; over the past 2 years, drug overdose deaths in WV increased 47% to 32.4 per 100,000 population, the highest per capita death rate in the United States. As a result of the increased prevalence of intravenous drug use, hepatitis B and C incidence have sky rocketed resulting in the highest and second highest rates, respectively, in the nation. Though there are a plethora of areas to potentially target, the impact will be greatest by focusing on the following health priorities: addiction and resultant emerging epidemics (hepatitis C), cancer, cardiovascular disease, and chronic lung disease.

**STRATEGIC OBJECTIVE**

BUILD A SUSTAINABLE RESEARCH INFRASTRUCTURE THAT SUBSTANTIALLY CONTRIBUTES TO IMPROVING WV HEALTH OUTCOMES BY 2022

**GOALS TO ADDRESS THE HEALTH NEED**

1. Recruit, train, and position for success the next generation of clinician scientists and translational researchers that excel in team science, positively impacting health in West Virginia.
2. Actively engage with multiple stakeholders, including communities, medical providers, and policy makers to drive research that improves health of West Virginians.

**MEASURE TO EVALUATE THE IMPACT**

### 2018 Progress Report

The following statistical measures were reported in 2018:

- 156 publications, 280 external funding proposals
- 2337 investigator development services through iLab Core Management System
- 76 TriNetX studies offered to date: 32 accepted
- 96 ECHO project sites
- 94 submitted pilot projects (35 awarded)
- 48 new custom IDR datasets and 54 completed IDR projects

30 biospecimen projects, 62 illumina genomics and 20 MicroCT imaging projects
# CAMC General Hospital

CAMC General Hospital (268 beds) focuses primarily on the neurological, orthopedic, trauma and rehabilitation service lines. Medicine and general surgery cross both Memorial and General Hospitals.

<tbody>
<tr>
<td>COMMUNITY HEALTH NEED</td>
<td>Drugs, Lack of Access to Mental Health Services</td>
</tr>
<tr>
<td>IDENTIFIED HEALTH ISSUE</td>
<td>Incidence of Hepatitis C and HIV</td>
</tr>
<tr>
<td>COMMUNITY SERVED</td>
<td>Counties in West Virginia are most vulnerable to outbreaks of HIV and HCV due to needle sharing during drug use according to the CDC. All of southern WV is identified as “at risk.” CAMC’s service area covers most of these southern counties.</td>
</tr>
</tbody>
</table>
| PROGRAM DESCRIPTION AND RATIONALE | Surveillance is showing an explosion of drug abuse in West Virginia and an increase in Human Immunodeficiency Virus (HIV) and Hepatitis C Virus (HCV) infections. It is estimated that 14% of HIV is undiagnosed and 45% diagnosed but not in care; while 50% of HCV infections are undiagnosed and 23% are not RNA confirmed. The FOCUS approach is to partner with government agencies, health systems and others in 30+ highly impacted cities to:  
- Make HIV and HCV screening a standard of care  
- Change public perceptions, overcome stigma  
- Increase stakeholder dialogue  
- Ensure patient linkage to care and treatment and to keep patients in care |
| STRATEGIC OBJECTIVE | INTEGRATE HIV AND HCV TESTING INTO ROUTINE SCREENING AS PART OF THE NORMAL CLINICAL FLOW AT CAMC EMERGENCY ROOMS AND CLINICS |
| GOALS TO ADDRESS THE HEALTH NEED | YEAR ONE  
1. Review CAMC policies  
2. Establish clinical workflows  
3. Assign staffing and resources  
4. Update protocols for testing, lab order sets and EMR modification  
5. Go live at CAMC General Hospital Emergency Department  
6. Cycle of Learning  
7. Innovation and Iterative Process  
YEAR TWO  
1. Expand to other emergency departments  
2. Establish system of care for treatment and follow-up  
YEAR THREE  
1. Expand to clinics |
| MEASURE TO EVALUATE THE IMPACT | Number of tests performed  
Number of positive patients identified through testing  
Diagnosed infections  
Number of patients attending first appointment |
| TIMELINE | Begin 4th quarter 2017 - 2020 |
| RESOURCES | Gilead FOCUS grant  
Operational budget |
2018 Progress Report

Reviews of CAMC policies were conducted in 2018 and we continue to study workflows and staffing resources. However, the Gilead FOCUS grant was not applied for in 2018 and will be under review in 2019.

### #7 CAMC General Hospital

</table>
| 2018 Progress Report | A study was completed highlighting how a previously rare life-threatening infection, IE, has dramatically increased in the wake of the Appalachian opioid epidemic. While the number of patients with IVDU-IE are eclipsed by the growing list of other opioid syndemic diseases (Hepatitis C, HIV and overdose), the costs per patient and overall healthcare system impact can’t be underestimated. The increase in IVDU-IE in southern West Virginia comes at a time when the region faces an unrelenting recession and after hospital resources have been extinguished by contracting reimbursements and regional economic challenges [17]. The Southern West Virginia energy sector contraction and associated unemployment persists, in part, due to concerns from new industries regarding relocation to a region with such a high incidence of opiate dependence in a potential workforce. This economic downturn cycle along-side increases in prescription opioid medications and influx of inexpensive heroin, have all likely participated in the regional opioid crisis [19, 30]. Further research is needed to understand the overall impact of illicit drug use in the region and the multiple socioeconomic issues or other causation variables that may be participating in the epidemic. However, based on the findings reported herein, investment in resources for high-risk areas, defined by geo-map driven hot spot analysis, for needle exchanges and...
rehabilitation centers may be warranted. Along those lines, we are now seeking to define clusters or regions with increased serious infection risk so we can study the impact of local interventions and hopefully translate these findings into preventive solutions.

Investigators have determined there is little value at this time in conducting further analysis and tracking readmission rates as very few of these patients are utilizing drug rehabilitation services.
CAMC Women and Children’s Hospital community benefit plan implementation strategy

CAMC Women and Children’s Hospital (146 beds) focuses on mother, baby, pediatric and gynecology service lines.

### PROGRAM DESCRIPTION AND RATIONALE

**Telehealth at South Central Regional Jail** - West Virginia has an epidemic of drug addiction with a high rate of addiction for incarcerated women. This comprehensive program will assist patients who are incarcerated obtain therapy services. Telehealth would allow pregnant women who are located at South Central Regional Jail to participate in individual or group therapy via the telehealth system.

### STRATEGIC OBJECTIVE

**DECREASE THE NUMBER OF DRUG AFFECTED MOTHERS AND BABIES AMONG INCARCERATED WOMEN**

### GOALS TO ADDRESS THE HEALTH NEED

1. Offer a program for pregnant women who are dealing with addiction via telemedicine.
2. Decrease the number of babies with Neonatal Abstinence Syndrome.
3. Prevent relapse of mothers.

### MEASURE TO EVALUATE THE IMPACT

- Number of participants
- Overall patient satisfaction
- Number drug free at delivery
- Number remaining drug free

### TIMELINE

2017-2019

### RESOURCES

Operational Budget
Prevention First Grant

### PARTNERS/ COLLABORATORS

Women’s Medicine Center
Neonatal Intensive Care Unit
Kanawha Charleston Health Department
Kanawha County Drug Court/Jail system
Right from the Start
Primary Care
CAMC Women and Children’s Hospital Emergency Department

### 2018 Progress Report

We were unable to clear certain legal obstacles with the prison system and we will not be pursuing this strategy.

### #11 CAMC Women and Children’s Hospital

**COMMUNITY HEALTH NEED**

Tobacco Use

**IDENTIFIED HEALTH ISSUE**

Tobacco use among pregnant women resulting in low birth weight babies.

**COMMUNITY SERVED**

Any patient delivering at Women and Children’s Hospital.
Any pregnant woman interested in attending a cessation class at the Family Resource Center.

**PROGRAM DESCRIPTION AND RATIONALE**

Offer a tobacco cessation class at the Family Resource Center and ongoing weekly one-on-one smoking cessation consultations at the Women’s Medicine Center.

**STRATEGIC OBJECTIVE**

**DECREASE THE NUMBER OF PREGNANT WOMEN USING TOBACCO PRODUCTS**

**GOALS TO ADDRESS THE HEALTH NEED**

1. Offer smoking cessation classes at the CAMC Family Resource Center on the Women and Children’s Hospital campus on a quarterly basis.
2. Offer weekly one-on-one smoking cessation consultation to patients in the Women’s Medicine Center.
### Measure to Evaluate the Impact

- Number of participants in the Tobacco Cessation Classes
- Number of participants who participate in the weekly cessation consultation sessions
- Number who quit tobacco use

### Timeline

2017-2019

### Resources

Operational Budget
Grant from the state of West Virginia

### 2018 Progress Report

The program assisted 233 women who were identified as tobacco users in the CAMC Women’s Medicine Center in 2018. The program had a self-reported 22.4% quit rate with a quit validation (CO levels at non-smoker) at 19.8%. The program’s quit rate continues to be above the National Quit Rate of 13%-18%.
<table>
<thead>
<tr>
<th>PROGRAM DESCRIPTION AND RATIONALE</th>
<th>Mental Health services have not been available to children with cancers. This program will provide consultations supporting the goal of providing a multidisciplinary approach to care for children with cancer. This program provides an initial contact for mental health services while hospitalized and, if needed, post-discharge or at any point during treatment or recovery.</th>
</tr>
</thead>
<tbody>
<tr>
<td>STRATEGIC OBJECTIVE</td>
<td>PROVIDE MENTAL HEALTH SERVICES TO CHILDREN WITH CANCER</td>
</tr>
<tr>
<td>GOALS TO ADDRESS THE HEALTH NEED</td>
<td>1. Offer mental health consultations to the pediatric oncology patients at CAMC Women and Children’s Hospital</td>
</tr>
<tr>
<td>MEASURE TO EVALUATE THE IMPACT</td>

#14 CAMC Women and Children’s Hospital

<table>
<thead>
<tr>
<th>COMMUNITY HEALTH NEED</th>
<th>Diabetes</th>
</tr>
</thead>
<tbody>
<tr>
<td>IDENTIFIED HEALTH ISSUE</td>
<td>Diabetes in pediatric patients</td>
</tr>
<tr>
<td>COMMUNITY SERVED</td>
<td>Pediatric patients in CAMC’s service area</td>
</tr>
<tr>
<td>PROGRAM DESCRIPTION AND RATIONALE</td>
<td>Offering a randomized, double-blind study comparing the effect of once-weekly dulaglutide with a placebo in pediatric patients with type 2 diabetes mellitus. Dulaglutide is like a natural hormone called glucagon-like peptide 1 that your body makes. Dulaglutide usually causes the release of insulin and lowers blood sugar in adults with Type II diabetes.</td>
</tr>
<tr>
<td>STRATEGIC OBJECTIVE</td>
<td>DETERMINE HOW DULAGLUTIDE COMPARES TO PLACEBO IN CHILDREN AND TEENS WITH TYPE 2 DIABETES.</td>
</tr>
<tr>
<td>GOALS TO ADDRESS THE HEALTH NEED</td>
<td>The primary objective of this study is to test the hypothesis that dulaglutide given subcutaneously once a week for 26 weeks to children and adolescents with type 2 diabetes mellitus who have inadequate glycemic control, despite diet and exercise, with or without metformin and/or basal insulin, is superior to placebo in the treatment of T2DM, as measured by baseline to Week 26 change in hemoglobin A1c.</td>
</tr>
</tbody>
</table>
| MEASURE TO EVALUATE THE IMPACT | • Change in HbA1c between baseline and Week 26  
• Change in fasting blood glucose between baseline and Week 26  
• Percentage of patients with HbA1c ≤6.5% at Week 26  
• Change in body mass index between baseline and Week 26 |
| TIMELINE | January 2017 through June 2022 |
| RESOURCES | CAMC Clinical Trials Center |
| PARTNERS/ COLLABORATORS | CHERI, Eli Lilly and Company, Inc., WVU Pediatrics faculty |
| 2018 Progress Report | We are currently enrolling patients in the trial and active. Therefore, we are unaware if the objectives have been met until the multi-center study has been completed and data analyzed. We currently enrolled 3 which has us listed as one of the top enrollers in this early phase trial. |
APPENDIX

LISTING OF ADDITIONAL 2018 COMMUNITY BENEFIT PROGRAMS FOR CHARLESTON AREA MEDICAL CENTER
Charleston Area Medical Center
Program Detail Full
For period from 1/1/2018 through 12/31/2018

Community Health Improvement Services (A)
Community Health Education (A1)

AARP Driving Safety Courses

Description: Educational program designed to demonstrate how age related changes may affect seniors' driving safety, promote safety, educate our geriatric population and reduce motor vehicle accidents.

Category: A1
Department: 25810 (CHERI)
Department Contact: Lee Layne (8-9903)

Objectives: Participants will understand age-related changes that may affect their driving and improve their safety on the road.

Persons: 20
Expenses: 250
Revenues: 0
Benefit: 250

ALA Bike Trek and Great Smoke Out

Description: Staffed the American Lung Association Bike Trek cycling event in Charleston and the Tobacco Free Day at the Capitol which promotes smoking cessation and raises money for the American Lung Association.

Category: A1
Department: 49642 (CAMC Cancer Center)
Department Contact: Bev Farmer (8-8399)

Community Need: Lung Disease/Asthma/COPD

Persons: 745
Expenses: 1,915
Revenues: 0
Benefit: 1,915

ALA Lung Force Expo

Description: Participated in the 2018 Lung FORCE Expo-Charleston which is a program designed for patients, caregivers and health care providers to learn more about the latest trends, resources and research around lung cancer, COPD and other chronic lung diseases.

Category: A1
Department: 49642 (CAMC Cancer Center)
Department Contact: Bev Farmer (8-8399)

Objectives: Educate the community via important lung disease information, share meaningful experiences, and care for yourself and others by expanding your lung disease knowledge.

Persons: 100
Expenses: 350
Revenues: 0
Benefit: 350
Alzheimer’s Walk

Description: Walk to promote awareness and raise funds for Alzheimer's Research.
Category: A1
Department: 46509 (Southridge Imaging Center)
Department Contact: Kelly Combs (8-7031)
Objectives: Raise awareness and funds to support Alzheimer’s Research.
Persons: 200
Expenses: 350
Revenues: 0
Benefit: 350

Asthma Awareness

Description: Informational displays at various community events. Staff participated on the COPD Coalition as well as presentations to the community promoting asthma awareness at local health fairs, grade schools, and community events.
Category: A1
Department: 42500 (Respiratory Care)
Department Contact: Chuck Menders (8-9401)
Community Need: Lung Disease/Asthma/COPD
Objectives: Promote awareness of asthma to support early diagnosis and treatment.
Persons: Unknown
Expenses: 500
Revenues: 0
Benefit: 500

ATV's Avoiding Traumatic Injuries

Description: A course designed to educate the public on ATV safety with a focus on the safe operation of the ATV. It discusses injury patterns associated with ATVs and the current ATV death count in WV and current ATV laws.
Category: A1
Department: 41232 (Trauma Services)
Department Contact: Doug Douglas (8-7809)
Persons: 50
Expenses: 200
Revenues: 0
Benefit: 200

Basic Life Support Training for the Community

Description: Free basic life support training and basic first aid classes offered to the community and to various groups like Girl Scouts.
Category: A1
Department: 25810 (CHERI)
Department Contact: Lee Layne (8-9903)
Community Need: Heart Disease/High Blood Pressure
Objectives: Train community members in basic life support skills.
Persons: 36
Expenses: 8,064
Revenues: 0
Benefit: 8,064
Bicycle Safety

Description: A safety presentation that provides facts on bicycle related injuries, helmet effectiveness, safety tips, hand signals and the rules of the road to area elementary school students.

Category: A1
Department: 41232 (Trauma Services)
Department Contact: Doug Douglas (8-7809)
Community Need: Lack of Physical Activity
Objectives: Prevent bicycle injuries and promote the use of helmets.

Persons: 250
Expenses: 160
Revenues: 0
Benefit: 160

Breast Cancer Awareness Activities

Description: Promoted breast cancer awareness at various community events and the Cancer Screening and Prevention Day in our community by providing literature and one-on-one education. Also provided support for the WVU Breast Education Conference.

Category: A1
Department: 46509 (Southridge Imaging Ctr)
Department Contact: Kelly Combs (8-7031)
Community Need: Cancer

Persons: 250
Expenses: 7,800
Revenues: 0
Benefit: 7,800

Breast Cancer Survivorship Group

Description: A support group for breast cancer survivors to meet and discuss prior treatments and experiences. Breast cancer survivors, family members and staff are all encouraged to participate.

Category: A1
Department: 49642 (CAMC Cancer Center)
Department Contact: Bev Farmer (8-8399)
Community Need: Cancer

Persons: 45
Expenses: 200
Revenues: 0
Benefit: 200

Camp Kesem

Description: Provided a social worker for the West Virginia camp designed to support children through and beyond their parent's cancer.

Category: A1
Department: 49642 (CAMC Cancer Center)
Department Contact: Bev Farmer (8-8399)

Objectives: Camp Kesem offers children a place where they can open up about their feelings and support each other while having fun together. They learn that they are not alone.

Persons: 200
Expenses: 4,872
Cancer Screening and Prevention Day

**Description:** A day of free education on Breast Health, Obesity/Exercise/Healthy Steps Program, Cervical and Ovarian Cancer, Skin Analyzer, Tobacco Cessation, Genetic Counseling for Cancer and HPV prevention at the CAMC Cancer Center. Free lung cancer risk assessment and in home colorectal screening kits are provided as well as oral, head and neck screening.

**Category:** A1  
**Department:** 49642 (CAMC Cancer Center)  
**Department Contact:** Bev Farmer (8-8399)  
**Objectives:** Educate the community on cancer and provide free screenings.  
**Persons:** 250  
**Expenses:** 3,806  
**Revenues:** 0  
**Benefit:** 3,806

Childbirth Education Program

**Description:** Program designed for newly expectant parents.

**Category:** A1  
**Department:** 43608 (Family Resource Center)  
**Department Contact:** Kelly Gilbert (8-2545)  
**Objectives:** Improved birth outcomes.  
**Persons:** 1,200  
**Expenses:** 70,000  
**Revenues:** 0  
**Benefit:** 70,000

Compassionate Friends Support Group

**Description:** Support group for bereaved parents.

**Category:** A1  
**Department:** 43608 (Family Resource Center)  
**Department Contact:** Kelly Gilbert (8-2545)  
**Objectives:** Nationally recognized support group for any bereaved parent.  
**Persons:** 125  
**Expenses:** 608  
**Revenues:** 0  
**Benefit:** 608

Distracted Driving/Driving Safety for Teens

**Description:** Presentation about distracted driving statistics and habits. Review of safe driving practices and teen driving safety followed by a question and answer session.

**Category:** A1  
**Department:** 41232 (Trauma Services)  
**Department Contact:** Doug Douglas (8-7809)  
**Objectives:** Create a greater awareness of the dangers associated with distracted driving by discussing the common causes, the potential outcomes and traffic accident statistics. This is then translated down to the impact it can have on the individual teen, their family, friends, and communities.  
**Persons:** 250  
**Expenses:** 160
Revenues: 0  
Benefit: 160

Driving Safety Community Events

Description: Presentations at various community events that include the use of a Virtual Driver Interactive Simulator to demonstrate the effects of distracted driving, drunk driving, and driving under the influence of medications.

Category: A1  
Department: 41232 (Trauma Services)  
Department Contact: Doug Douglas (8-7809)

Objectives: Prevent traffic accidents and fatalities.

Persons: 250  
Expenses: 128  
Revenues: 0  
Benefit: 128

Health Information Center

Description: The Health Information Center provides up-to-date reliable health information via the website.

Category: A1  
Department: 25780 (Health Information Center)

Department Contact: Lee Layne (8-9989)

Objectives: Promote health education in the community.

Partners: Lung Association  
American Cancer Society  
American Heart Association

Persons: 32,000  
Expenses: 50,000  
Revenues: 0  
Benefit: 50,000

Imagine U: A Virtual Healthcare Experience

Description: CAMC broadcast of a craniotomy surgery narrated by a local physician via web cast to introduce students to careers in healthcare using technology that links health science classrooms to the real world of health care and hospitals. Students from Boone, Clay, Roane, Jackson, Kanawha and Putnam Counties participated.

Category: A1  
Department: 21926 (Human Resources Workforce Dev)

Department Contact: Debby Schoolcraft (8-3376)

Community Need: Educational Attainment/High School Dropout

Objectives: Expose the students at eleven high schools in Kanawha and Boone Counties, four vocational and technical centers to health care careers.

Partners: WV Department of Education

Persons: 2,000  
Expenses: 9,869  
Revenues: 0  
Benefit: 9,869

Keys for Healthy Kids 5-2-1-0 Program
